

COOK ISLANDS ESSENTIAL MEDICINES LIST NOVEMBER 2017

Updated pursuant to the Drug & Therapeutics Committee Meeting held in November 2017

INTRODUCTION

Medicines listed in the Cook Islands Essential Medicines List (EML) have been approved by the Cook Islands Ministry of Health Drug and Therapeutics Committee for use in Ministry of Health hospitals, clinics and pharmacies in the Cook Islands.

1.1 Policy

Only medicines listed in the EML are recommended for use and are available in the Ministry of Health pharmacies and hospitals.

For medicines not listed on the EML practitioners have the following options:

- changing to an EML-listed alternative
- provide a prescription to enable the patient to purchase their supply from a community pharmacy

Where there is an ongoing requirement for a non-EML medicine, and an EML-alternative is not available, prescribers may apply for a 'named patient' supply by completing the "Special Request for the Supply of a non-EML Medicine for an Individual Patient" form available for download from the Ministry of Health website at <http://www.health.gov.ck/clientsconsumers/essential-medicines-list/>.

The appropriate sections of the form should be completed by the requesting prescriber and then forwarded to the Chief Pharmacist for further completion and consideration by a Standing Committee of the Drug and Therapeutics Committee. Patients approved for a 'named patient' supply are able to have prescriptions for their medicine filled at their nominated Ministry of Health Pharmacy, once a supply of stock has been obtained (2-3 weeks).

There are also some medicines listed in the EML that are only available on a 'named patient' and/or designated prescriber basis.

Prescribers can request the addition to, or removal of a medicine from the EML by using the "Request for the addition of a Medicine to the Essential Medicines List" form on the Ministry's website (<http://www.health.gov.ck/clientsconsumers/essential-medicines-list/>). This should be forwarded to the Chief Pharmacist for consideration at the next Drug and Therapeutics Committee meeting.

1.2 Presentation

Items listed in the document are listed alphabetically in each section, in the following presentation:

MEDICINE	FORM	STRENGTH/SIZE	NOTES
----------	------	---------------	-------

1.3 Indexing

The indexing system of the WHO EML has been maintained for ease of updating and comparison. Medicines listed under different headings are approved and recommended for use for that condition.

Individual medicine entries can be located using the Index at the back of the document, or by hovering over the section heading in the Table of Contents and using Ctrl+Click to go to that section, or by searching using the "CtrlF" function. Note that individual medicines may appear under more than one category.
