

# How to prevent mosquito breeding sites in and around your home

The *Aedes* mosquito can transmit dengue, chikungunya and Zika

Change the water in flowers vases at least once a week, pouring the used water out over the ground

Turn over containers that cannot be thrown away and protect them from rain.

Pour out water from flower pots

Make sure all tanks, water deposits and containers are covered and sealed to keep out mosquitoes

Keep tyres under shelter, protected from rain

Keep grass short and weed-free

Clean all drains and gutters

Safely dispose of any unused containers and objects that can accumulate water

**No breeding sites, no mosquitoes,  
no dengue, chikungunya or Zika**
